I-STEM Business Mission

The I-STEM mission as it relates to business in Northwest Indiana is to provide a forum and means for business so they may contribute to the I-STEM initiative. Business' input about their needs in the STEM areas as it relates to their economic growth is critical to the success of the I-STEM Resource Network. Direct involvement and support of business will be sought on a regular basis. I-STEM will facilitate the connections and coordinate programs necessary to bring business together with STEM students who will be their future employees.
